

## **DRINKING WATER NOTICE**

### **Monitoring requirements were not met for Buckeye Water District Public Water System**

Monitoring requirements were not met for the Buckeye Water District Public Water System during October 2016.

The October 2016 source water samples for Cryptosporidium, E.coli counts, and turbidity were collected, but not in accordance with our sampling schedule or the acceptable time frame established by rule.

We are required to collect these samples to determine if additional treatment of our source water is necessary. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did to correct this situation.

What Should I Do?

- There is nothing you need to do at this time. You do not need to boil your water or take other corrective action.

What is being done?

Upon being notified of this violation, the water supply was directed to revise the sampling schedule to include another sampling date. The adjusted schedule will not affect our ability to determine if more treatment is needed, or to install such treatment with the required timeframe, if it is necessary. The water supplier will take steps to ensure that adequate monitoring will be performed in the future.

For more information, please contact Todd Brown at 330-532-2959 or at PO Box 105 Wellsville, OH 43968.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
